Work Experience:

Project	LinguaMate for Collaborative Translation (July 2017 to May 2018)
Domain	Localization / Product
Role	Team Member
Details	LinguaMate is a collaborative translation platform created to facilitate real-time exchange of information between translators, reviewers as well as the customers. It operates as a virtual office and aims to redefine the entire translation eco-system. It also has several enhanced features to aid more accurate translations, and have several special resources for Indian languages.
Responsibilities	<ul style="list-style-type: none">• Creating test cases according to functionality.• Testing on desktop for Multilanguage.• Preparation and Delivery of weekly status report.• Performing functional testing.• Performing testing on different file format (eg word, excel, xliiff).• Test case execution and identify Critical and functional defects.• Defect reporting.

Project	Linguify for Localization (Jan 2018 to Present)
Domain	Localization/ Product
Role	Team Member
Details	Linguify is the flagship product of LinguaSol with 80+ banks, PSUs, private enterprises using it effectively. Linguify is an external middleware product that can localize the UI (user interface) of any web - enterprise - desktop mobile - software application or website to any language without the need to modify the source code. This external approach makes Linguify a safe, secure and speedy way to localize complex enterprise applications and websites. The translation itself is manually done and not machine translation, thereby enterprise can assure the quality to their customers.
Responsibilities	<ul style="list-style-type: none"> • Execute all the test cases and report defects, define severity and priority for each defect. • Carry out Regression Testing every time when changes are made to code.
