❖ **Memberfactory**

Description: The main purpose of memberfactory is creating membership sites. For e.g. if people wants to share the any kind of knowledge using websites to all over the world so they just create memberships site, for that simply need to complete 4 wizard steps and after that user can add any types of content in that site. User can create plan for that content and also can add free contents, create sales page. so any one can purchase that site and access content of it. Project basically deals with the customer to placet he contents about their business on the website.

- **Unlimited Projects**: Build as many membership projects as you want. Manage them from one dashboard. Target multiple niches effortlessly from one account.
- **White-label Options:** Customize the membership projects with your own brand – including the logo, color scheme, and URLs to access your member's area.
- **Brand Control**:Use your company name and email address in all outgoing emails. You may use a different name and email for each of your membership projects.
- **Multilingual**: Use language manager to change the language of your membership sites
- Professionally designed membership themes that can be fully customized for your brand.
  Use point 'n click site designer to change the colors, logo, and layouts. Save your settings to be used in your other membership projects.

- ❖ **CoachRack (**Build professional, social, and interactive online schools**)**

  Description: The main purpose is for creating different types of courses. In that courses user can add different types of lesson like text, video, audio, attchments. In coachrack there is also user need to create site like Memberfactory and add that courses in particular site. So that anyone can access that site once purchase it.
